Great Power is a world-class battery manufacturer that was established in 2001 and listed on the stock market in 2015 in China (stock code: 300438). The company has over 20 years of experience specializing in lithium-ion battery manufacturing, research, and development.

What are GPB hybrid lithium automotive starting batteries?

GPB Hybrid Lithium Automotive Starting Batteries are designed with dual-purpose start-stop starting function and deep-cycle lithium solution that can withstand high-heat environments due to their heat-resistant technology. Built with premium LiFePO₄ pouch cells which used by Mercedes and BMW, it can output up to 1800CCA depending on the product.

What is a GPG battery?

The GPG series products are manufactured with nano silica gel technology, one of the two valve-regulated battery production technologies used in the industry, and have porous PVC separators and colloidal electrolyte inside. This series can work under high and low temperature, supports cyclic deep discharge, and has a long service life.

What is a high precision battery monitor?

Our HIGH PRECISION battery monitors are designed to measure the current state of a battery's function. Measuring voltage, current and capacity in real time. It can be used with wide range of batteries BMS systems bring new dimension to economic effectiveness for applications using lithium based batteries.

What is a great power pouch cell?

Great Power pouch cells are optimized for light weight and compact volume, and are widely used in residential storage. The excellent adaptability and scalability of the battery ensure high safety and stability LiqPack AirPack

What is great power's sodium-ion battery technology?

Great Power's groundbreaking research in sodium-ion battery technology initiated in 2019. In 2021, the company strategically outlined and advanced sodium-ion battery technology, securing approvals for multiple patents in layered oxide and poly-anion technical systems.
