

What is a Growatt series photovoltaic inverter?

Require to order extra if you need it. Growatt series photovoltaic inverters are used to convert the direct current generated by photovoltaic panels into alternating current, and send it to the grid in a three-phase manner.

Does Growatt inverter have export limitation?

This series inverter has integrated export limitation functionality. To use this function, you can connect the Growatt smart meter. For the detailed information, please contact with Growatt. Active power control with a Radio Ripple Control Receiver (RRCR).

Does Growatt new energy notify users of any changes to this manual?

Growatt new energy will notify users of any changes to this manual. CAUTION indicates a hazardous situation which, if not avoided, could result in minor or moderate injury. NOTICE is used to address practices not related to personal injury. Information that you must read and know to ensure optimal operation of the system.

How many strings can Growatt mod 3-10k tl3-xh series inverter connect?

Growatt MOD 3-10K TL3-XH series inverter can be connected to 2 strings, has 2 maximum power tracking point trackers, so suitable for connection 2 Set of arrays of different panels.

What if I have technical questions about Growatt products?

Compliance certificates 18 If you have technical questions about our products, please contact the Growatt New Energy Service Hotline. We need the following information to provide you with the necessary help:

How long does a Growatt inverter take to discharge?

⚠️; Danger to life due to high voltages in the inverter There is residual voltage in the inverter after the device shutdown. The inverter needs to take 20 minutes to discharge for safety. ⚠️; Persons with limited physical or mental abilities may only work with the Growatt inverter following proper instruction and under constant supervision.
