

How does a Growatt inverter work?

The Growatt inverter is to be used solely to feed solar energy converted photovoltaically into the public grid. The inverter is suitable for mounting indoors and outdoors. You can use the AC current generated as follows: Energy flows into the house grid. The consumers connected, for example, household devices or lighting, consume the energy.

What is a Growatt UE series inverter?

Growatt UE series inverters are multi-string inverters with multi-MPP trackers, which mean they are able to connect to different PV module arrays. The inverter may only be operated with a permanent connection to the public power grid. The inverter is not intended for mobile use. Any other or additional use is not considered as intended use.

Which kind of Inverter should Growatt provide?

We recommend customer should decide which kind of inverter if required prior to purchasing. GROWATT can only provide lithium battery that is compatible with inverter, no lead-acid battery will be provided by Growatt as customer can easily buy these from the market.

Do Growatt UE series inverters need a separate energy meter?

The Growatt UE series inverters need install a separate energy meter. The energy produced is compensated at a rate depending on the electric power company. Grounding the PV modules and the PV generator. Continuous conduction and ground these in order to have optimal protection of the system and personnel. Some components in the inverter are live.

What is Growatt SPH series inverter without fan?

Growatt SPH series inverter without fan so belongs to natural cooling, hot air from the top of the radiator, tie-in battery, use environment for IP65, please pay attention to the temperature of the installation environment, to ensure that the battery's safety and the normal work of the machine.

How should a Growatt generator be connected?

GROWATT recommends connecting the generator frame and other electrically conductive surfaces in a manner which ensures continuous conduction with ground in order to have optimal protection of the system and personnel. ⚠; The components in the inverter are live. Touching live components can result in serious injury or death.
