

How do I log in to Growatt?

To log in to Growatt, visit the Growatt for Installers website at "oss.growatt.com". Click on "Login", enter your installer login information, and click "Sign In".

How do I access the Growatt installer panel?

To access the Growatt installer panel, open your browser and go to 'oss.growatt.com'. Sign in as an installer by clicking 'Login', entering your installer login information, and clicking 'Sign In'.

How does a Growatt Inverter work?

A Growatt Inverter converts DC Current from a PV generator into AC current. It is suitable for mounting indoors and outdoors. The inverter converts DC power into AC power that can be used as follows: Growatt can preset special grid parameters for other countries' installation locations according to customer requests after evaluation by Growatt.

How do I use the Growatt server?

To start using the Growatt server, users must go through the login process. This is a key step that allows access to various functions for monitoring and managing a photovoltaic system. The process is relatively straightforward and requires correct credentials, which are provided during system installation.

What to do if Growatt inverter error message is displayed?

If a Growatt inverter displays an error message, first check the inverter operation state. If the error message persists, contact Growatt for assistance. Ensure that the panel enclosure and inverter are properly grounded. Check if the DC breaker is wet. If the error message still appears after these checks, contact Growatt for further assistance. Restart the inverter.

What is the Growatt installer code?

The Growatt Installer Code is a key initiative for our partners. Thanks to it, installers not only identify their projects, but also gain access to customized offers, preferential terms for equipment purchases and technical support. This tool is designed to make installers more efficient and support their success.
