

How do I connect the Growatt inverter to the battery?

The Growatt Inverter will connect to the Battery via: Inverter (CAN Port) to Battery (CAN Port) Straight RJ45 to RJ45 wire - 1500mm. Ensure that the clip is pointed away from you when counting the pins. To connect battery BMS, need to set the battery type as "LI" in Program 05.

What is the default setting for a Growatt 3KW inverter?

If you have an account, sign in now to post with your account. Reply to this topic... Hi everyone. So just had a growatt 3kw system installed only two panels for now with plans to expand. The default setting on the inverter is solar first then the grid takes over when the panels are no longer producing power.

How many settings should a Growatt inverter have?

As it will default over 20 - 30 settings and update all together i.e. you will need to make sure all the default values are updated back to your preferred settings even if you only need to update 1 setting. My observation however is that the server.growatt.com retrieves the current settings from the Inverter so may be this is not correct.

What is the default setting on a solar inverter?

The default setting on the inverter is solar first then the grid takes over when the panels are no longer producing power. My concern is that when the solar production in the afternoon drops below the consumption load then the battery takes over until the panels stop producing and eskom kicks in.

Are Growatt inverters compatible with Hubble batteries?

The Growatt inverters are compatible with the Hubble range of batteries, however compatibility varies depending on the inverter series. Please take special note of the ES Series Setup mentioned below. The following field guide will assist with the correct battery settings you should use.

How do I connect a Growatt inverter to a Cloudlink battery?

The Cloudlink will connect to the Battery via: Cloudlink's (Serial/RJ12 Port) to the Battery (RS232/RJ12 Port) (Black Cable) - RJ12 to RJ12 (450mm) cable. The Growatt Inverter will connect to the Battery via: Inverter (CAN Port) to Battery (CAN Port) Straight RJ45 to RJ45 wire - 1500mm.

The Growatt inverters are compatible with the Hubble range of batteries, however compatibility varies depending on the inverter series. Please take special note of the ES Series Setup mentioned below. The following field guide will assist with ...

The Growatt Shinephone inverter settings page. Right at the top, you see TOU-Discharging. That's what we want to set. It should really be called Export to Grid, that would be clearer. Tap the TOU-Discharging option, and ...
