

Does Growatt provide localized service support?

As a global leading distributed energy solution provider, Growatt provides localized service support with a combination of online and offline support. Customers can access online training resources on our YouTube channel or attend our webinars and in-person events for an engaging learning experience. Check out our training events!

How can Growatt be contacted for support?

Growatt provides localized service support to end users through subsidiaries and dedicated sales and customer support teams with a combination of online and offline support, including customer hotlines, mobile apps and onsite support.

What services does Growatt New Energy provide?

Growatt New Energy offers assistance with tender projects related to photovoltaic installations. Our services include end-to-end support, starting from advising on bid requirements to coordinating delivery and commissioning.

What protocol must the Growatt inverter support?

The Growatt inverter must support the modbus protocol (some older inverters only support proprietary serial communication). Connect the RS232 DB9 usb adapter to the RS232 port on the underside of the inverter (you might have to remove a cover plate). Depending on the firmware version of your inverter, not all attributes might be available.

How do I connect a Growatt inverter via Modbus?

To connect a Growatt inverter via Modbus, first ensure your inverter supports the Modbus protocol. Then, connect the RS232 DB9 USB adapter to the RS232 port on the underside of the inverter. Depending on the firmware version of your inverter, not all attributes might be available.

How can Growatt help with your projects?
