

What is a Growatt series photovoltaic inverter?

Require to order extral if you need it. Growatt series photovoltaic inverters are used to convert the direct current generated by photovoltaic panels into alternating current,and send it to the grid in a three-phase manner.

How should a Growatt inverter be connected?

GROWATT recommends connecting the generator frame and other electrically conductive surfaces in a manner which ensures continuous conduction with groundin order to have optimal protection of the system and personnel. The components in the inverter are live. Touching live components can result in serious injury or death.

Can a Growatt inverter be repaired?

The monitoring equipment is not standard,it needs to be purchased separately. As for detailed installation and use methods,please refer to its own manual. The inverter can be repaired on site or transported to the Growatt service center for repair,or it can be replaced with a new one based on the model and service life of the machine.

What is Growatt SPH series inverter without fan?

Growatt SPH series inverter without fan so belongs to natural cooling,hot air from the top of the radiator,tie-in battery,use environment for IP65,please pay attention to the temperature of the installation environment,to ensure that the battery's safety and the normal work of the machine.

How to clear error code on Growatt inverter?

Typically,the error code can be cleared once the cause or fault is removed. Some of error code as table shows below,may indicate a fatal error and require you to contact the supplier or Growatt for help. After shutdown,Check the panel terminal. Restart inverter.

How to use export limitation CT / meter in Growatt series inverter?
