

What is a Halfords 20W solar maintainer?

Features & Benefits: Keep your vehicle's battery topped up even if you don't frequently drive it with the Halfords 20W Solar Maintainer. This eco-friendly charger generates extra power to help you avoid a flat battery.

What is Halfords solar battery maintainer 6W?

Booking system unavailable, please try again later. The Halfords Solar Battery Maintainer 6W is a clean and green energy solution to keep your battery level topped up. It is ideal for maintaining 12V batteries in cars, motorbikes, boats, trucks, caravans and other applications up to 250Ah.

Does Halfords 2.4W solar battery maintainer work?

We tested the new Halfords 2.4W Solar Battery Maintainer on a 2-litre petrol car that will, fairly reliably, drain its battery to the point that it won't start within about 10 days. For the owner -- me -- it is a frequent cause of frustration. Using the supplied suckers, the panel sticks neatly inside the windscreen but it could also lie on the dash.

How much does Halfords solar battery maintainer cost?

Two additional power levels of Halfords Solar Battery Maintainer are available: the 1.5W version is priced £15 while the 6W panel is £39. Owners of old cars will at some point have sat in their pride and joy, and turned the key, only to hear the dreaded clunk of a reluctant starter motor. The culprit is usually the battery.

Can a solar-powered maintainer keep a car battery topped up?

The solution, as old hands will know, is to connect a maintenance charger to keep the battery topped up. However, it's not always desirable or even possible to run a mains cable outside the house to keep the unit plugged in. The answer could be a solar-powered maintainer, according to Halfords. Browse NEW or USED cars for sale on driving.co.uk

Can a solar battery maintainer run a petrol car?

The answer could be a solar-powered maintainer, according to Halfords. Browse NEW or USED cars for sale on driving.co.uk We tested the new Halfords 2.4W Solar Battery Maintainer on a 2-litre petrol car that will, fairly reliably, drain its battery to the point that it won't start within about 10 days.
