

What is a HALO Solar Panel?

The HALO Solar Panel is a portable solar panel designed to keep your Power Station and other battery-powered devices charged. It ensures your devices remain at 100% power level no matter where your adventure takes you.

What is a HALO Power Station (V2) solar panel?

The HALO Power Station (V2) solar panel is a high-efficiency, up to 100W solar panel that turns sunlight into clean energy to charge the HALO Power Station (V2) and other everyday battery-powered devices. It features two USB-A output ports, a USB-C output port, and a DC output.

What is a halo power station?

With an advanced 1843.2Wh Lithium Iron Phosphate battery, the Power Station provides multiple charges for USB-powered devices, wireless capable devices, AC-powered and even DC-powered devices for versatile charging performance. Experience one of the fastest recharging rates on the market thanks to HALO's rapid recharging technology.

Why should you buy a halo power station 2400?

The HALO Power Station 2400 provides powerful performance for multiple users across multiple days, portability to keep up with your travels, a robust design, and versatile charging capability. Easily charge the power station at home, in the car or via the sun (solar panel not included).

Why should you buy a halo power station 1600?

The HALO Power Station 1600 provides powerful performance for multiple users across multiple days, portability to keep up with your travels, a robust design, and versatile charging capability. Easily charge the power station at home, in the car or via the sun (solar panel not included).

What is the meaning of a solar halo?

A solar halo is a luminous halo parallel to the horizon at the altitude of the sun, caused by ice crystals in the atmosphere. (Also known as parhelic circle or parhelic ring.)
