

Is it possible to harness solar energy?

There are no problems in harnessing solar energy, you can do it multiple ways from concentrated solar thermal, to normal PV panels. There are however problems in RELYING On just Solar.. you need either a back up / base generator, storage, or both, so you have power when you want, how you want, as much as you want.

How good is solar harness mob?

Very Happy - Thanks to the Solar Harness Mob we are saving over a thousand pluss dollars off our Jacarna bill each quarter (Yes our bills were ridiculously high) and now they are manageable. Instalation wast quick and smooth. I have not had to contact Solar harness at all since and that was a year ago. So far so good.

Why should I choose solar harness?

Solar harness was the only one who had a track record that guaranteed replacement over a long period of time for product failure. The entire install was completed in a day to a very professional standard & the technician was extremely helpful ... Read more & explained how to use & log in to the remote app.

Would you consider using Harness Power?

I would not consider using or recommending Harness Power. About 1.5 years ago,my household purchased a solar installation for our home in Costa Mesa,CA from Larsun,which was later bought out by Harness Power. We were promised and purchased a system that we did not receive.

What is Harness Power?

Harness Power is a Renewable Energy Company. It is focused on providing a simple and positive experience for all customers. Much of its business is generated through referrals,which is a testament to the attention it provides to each of its projects.
