

How do I charge my electric car in Canada?

We offer one of Canada's largest selections of home charging stations. All electric cars need to be charged by plugging in. You can recharge using a standard wall socket or an EV charging station. The time it takes to fully charge is based on the level, or speed, of charging and how full the battery is.

Which EV charging stations are available in Canada?

ChargePoint has an extensive network of EV charging stations that span the globe. Canadian EV drivers can purchase the ChargePoint Home Flex charging station. The model comes in three versions: Hardwired, NEMA 6-50 Plug, and NEMA 14-50 Plug. Each version has two connector options: NACS for Teslas and J1772 for all other EVs.

Where can Smart Charge Canada install electric car charging stations?
