

How much do solar panels cost in Michigan?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Michigan homeowner needs a 9.63 kW solar panel system to cover their electricity needs, which comes out to \$30,018 before incentives. Prices range from \$25,515 to \$34,521, but after the federal tax credit, that drops by 30%.

Should you get solar panels in Michigan?

Factor in the federal solar tax credit, and Michiganders can cut the cost of solar by thousands of dollars, speeding up your payback period and increasing the value of your investment. Here's what you need to know about getting solar panels in the Wolverine State.

Is Michigan a good place to go solar?

Solar incentives in Michigan include rebates and loan programs, but the federal solar investment tax credit (ITC) is still the best financial incentive for going solar in Michigan. The ITC credits 30% of the system's total cost -- including equipment, labor and permits -- toward what you owe on federal income taxes.

Are solar panels tax deductible in Michigan?

The federal solar investment tax credit is usually the most significant financial incentive for homeowners buying solar panels. It is not a rebate or a refund but goes toward what you owe on federal income taxes. In Michigan, you can lease a system or enter a power purchase agreement with lower upfront costs.

Do solar panels pay off in Michigan?

Based on feedback from dozens of solar customers in Michigan, the general consensus is that solar panel investments pay off over time. On average, Michigan homeowners with solar panels avoid \$53,663 in total utility costs over 25 years. The average solar panel installation costs \$3.15 per watt in Michigan.
