

Are solar panels a good option in Ontario?

Switching to solar energy is becoming more popular in Ontario, thanks to the environmental benefits and long-term savings. At Xolar, we help homeowners understand the costs, the installation process, and the available incentives to make switching to solar simple and affordable. **How Much Do Solar Panels Cost in Ontario?**

How many solar panels do I need in Ontario?

Using this number, we can calculate the system size to offset 100% of energy consumption. When we do, we find out that an 8 kW system will be sufficient to power the average-sized home in Ontario. If you consider the usual solar panel size of around 400 watts, that means you would need about 20 panels to power your entire house.

How much do solar panels cost in Ontario?

A typical system costs between \$3 and \$3.5 per watt of installed capacity. So an 8 kW system would need around \$24,000, which can be reduced based on the available incentives and rebates. To summarize, we can say that a typical Ontario house needs anywhere between 5 and 10 kW of solar panels, depending on the energy consumption of its residents.

Can you put solar panels on a roof in Ontario?

While most urban Ontario homeowners put solar panels on the roof, you can also install a solar system in your yard if you have the space. Using our same example and a solar system size of 4.75 kW: $4.75 \text{ kW} / 0.3 \text{ kW} \times 18 \text{ sqft} = 285 \text{ sqft}$ (amount of space needed) **How much does it cost to install solar panels in Ontario?**

How much electricity can a solar system produce in Ontario?

According to data from Natural Resources Canada, the average solar system in Ontario can produce 1166 kWh of electricity per kW of solar panels per year. Here is how much an average solar system can produce each month, as well as the solar irradiance potential map for Ontario:

Does Ontario have a solar system?

Ontario has the fifth-highest potential to produce solar energy in all of Canada, receiving more solar irradiation than most other provinces except for the prairies and Quebec! According to data from Natural Resources Canada, the average solar system in Ontario can produce 1166 kWh of electricity per kW of solar panels per year.
