

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home, assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems.

What should homeowners do before choosing solar energy?

Before starting the process of powering your home with solar energy, homeowners should investigate their energy use and consider potential efficiency upgrades. They should be well aware of their total electricity usage, and consider low-cost and easy-to-implement efficiency measures before choosing solar.

What are the options if I rent my home and want solar electricity?

Even if you rent your home or don't want to purchase a rooftop system, there are many programs that will enable you to still benefit from solar electricity. Purchasing and installing a system that you fully own and maintain is no longer the only option if you want to go solar.

Are solar panels a good option for homeowners?

Fortunately for the solar-curious, many options exist for homeowners and even renters to get some or most of their electricity needs met with energy from the sun. The most common way to go solar for homeowners is the installation of panels on their roofs.

How do I choose the right type of Solar System?

Choosing the right type of solar system depends on your energy needs, location, and budget. Here are the main types of residential solar solutions: Grid-tie solar systems connect directly to the public electricity grid, allowing homeowners to use solar power when available and draw from the grid when needed.

What can you do with the electricity produced by solar panels?

The electricity produced by solar panels can be stored in a battery or converted into AC power that is distributed throughout your home's electrical system. Also known as photovoltaic (PV) systems, solar panels absorb sunlight and convert energy from the sun into electricity you can use in your home.

Types of Home Solar Systems. When deciding to switch to a solar power system for a home, there are three types of systems homeowners can choose from: grid-tied, off-grid, and hybrid. Let's look at how each one works. ...
