

How much does a home solar system cost?

Home solar systems typically range from \$6 to \$12 per square foot of living space. The actual cost may vary based on the size and electricity consumption. These estimates are assuming the homeowner claims the 30% federal tax credit for the solar system.

How much does it cost to install a solar panel?

(Mar 2025) Solar panels generate "free" electricity, but installing a system still costs money. A typical 8-kilowatt (kW) solar panel system costs \$22,712 before considering any financial incentives. Your energy needs determine the system size you need, which affects the overall price of your solar panel installation.

What is the cost of a solar system?

The cost of a solar system typically ranges from \$16,500 to \$21,000. The national average cost for solar installation is about \$19,000. Most of the time, solar system costs are listed as the cost per watt of solar installed, making it easy to compare prices between quotes for different system sizes.

How much does a 5 kilowatt solar system cost?

The average 5-kilowatt (kW) solar panel system is \$14,210 before considering any financial incentives. However, a typical American household needs a system closer to 10 kW to adequately power their home, which costs \$28,241 in 2024. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

How much does solar energy cost per watt?

The cost per watt is what you pay for each unit of power of your solar energy system. Think of it a little like "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes. As of publishing, the average cost per watt is \$2.84.

What is the cost of solar panels per square foot?

On average, solar panels cost \$8.77 per square foot of living space, after factoring in the 30% tax credit. However, the cost per square foot varies based on the size of the home. For example, the post-tax credit cost of solar panels for a 2,500-square-foot home is around \$20,000 for a rate of \$7.96 per square foot.

Existing solar systems typically have solar inverters, which change the DC power produced by panels to AC power that can be consumed in your home or exported onto the grid. But if you want to store that AC power in a ...
