

# How expensive to charge your car at public station

How much does it cost to charge an electric car?

The cost to charge an electric car remains less expensive than the price of gas, which is around \$3.50 per gallon. Charging an EV is roughly \$12 to \$16, depending on the various factors listed above. Peak charging times are more expensive, and states like Hawaii, Alaska, and California have much higher rates. How much do charging stations cost?

How much does it cost to charge a car?

Public Level 2 stations charge between \$2.20 and \$8.80 for a full charge, depending on the network. DC Fast Chargers (Level 3): These provide rapid charging, with costs rising to \$0.40 to \$0.60 per kWh. They're ideal for drivers seeking quick top-ups during long trips but come with higher fees.

Are public charging costs the same everywhere?

Public charging costs are not the same everywhere. Some automakers like Tesla and Hyundai provide free charging at certain stations. Many public stations used to charge based on time, but the industry is now focusing on billing by energy use in kilowatt-hours. This approach is considered fairer for most drivers.

Are electric car charging stations free?

Sometimes a parking garage owner will install a charging station, making it available for electric car owners parking in the garage. Some of these public charging stations are free, while others cost money with a fee that varies from station to station.

Does a charging station charge a parking garage?

An electric car at a charging station is not only consuming electricity, it is consuming a parking space. In some cases the parking garage fees are included in the fee for using the charging station, and in other parking garages the two fees are paid separately.

How much does it cost to charge an EV?

The average U.S. cost to charge an electric vehicle (EV) is about 16 cents per kilowatt-hour. One kilowatt-hour can move most EVs two to three miles.
