For a rough calculation of how much it costs to charge at your home, take a look at the average electricity an electric car uses here. What is the cheapest time to charge your electric car at home?

How much does it cost to charge an EV?

The average U.S. cost to charge an electric vehicle (EV) is about 16 cents per kilowatt-hour. One kilowatt-hour can move most EVs two to three miles. EV drivers can often benefit from reduced rates from their electric utility that encourage charging when demand is lowest, typically from 11 p.m. to 6 a.m.

How do you calculate the cost of electric cars?

This is your cost of electricity. Then, multiply this number by the kilowatt hour capacity (how much electricity the battery can hold) of the electric vehicle you're considering. This is the cost per charge. If you know (or can roughly guess) how many miles you drive annually, you can also estimate the cost per year.

How long does it take to charge an electric car?

Fast chargers are significantly more powerful than regular AC charging stations and can deliver between 50 and 400 kWh. As a result, charging a vehicle with DC charging can take between 15 minutes and 1 hour to charge most passenger electric vehicles up to 80 percent.

How do I charge my eV at a public charging station?

To charge your electric vehicle (EV) at a public charging station, use an app like ChargeHub, PlugShare, or Chargemap to find nearby locations with available plug types. You may need a membership or to log in with your phone to recharge your EV at some charging stations.

What does a public EV charger cost?

The cost of using a public EV charger varies. Most public chargers range in price from free to an hourly or per kilowatt charge, depending on the charger and location. EV charging infrastructure is expanding in the U.S., creating more options for public charging.

Aside from Tesla chargers, other stations typically charge either a flat rate, a fee based on consumption or a fee based on the amount of time an EV driver uses the charger, Boutziouvis said.

Tesla : Free for Destination AC chargers (up to 22kW) Exploren : 0-40c/kWh (up to 11kW - prices subject to change depending on location, duration of charge, on/off-peak time, and energy tariff)
