

# How much does synergy pay for solar power

How much does synergy charge per kWh?

In Western Australia, the current Synergy feed-in tariff rate is 10 cents per kilowatt-hour (kWh) exported between 3 pm to 9 pm, and 2 cents per kWh exported at any other time. As Synergy is the primary energy retailer for Western Australia's main grid network, this is the most common feed-in tariff type statewide.

What is a synergy electricity rate?

The set-and-forget 'easy' Synergy electricity rate is more appealing to users who choose to be less concerned about how and when they use energy. The rates within the Synergy Home Plan (A1) tariff ensure a mid-range cost of electricity. How much you pay depends on your 'anytime' energy consumption.

What is a synergy solar feed-in tariff?

The Synergy solar feed-in tariff (or DEBS - Distributed Energy Buyback Scheme) is minimal compared to alternative states in Australia where variable energy markets and increased competition exist.

Does synergy offer solar energy during peak daylight hours?

Fortunately, solar energy is available on the grid during peak daylight hours and it's cheap. It is so abundant that Synergy is offering the cost of electricity during peak solar production periods at a quarter (8.4050 cents/kWh) of the Home Plan A1 tariff price.

How much does solar energy cost in WA?

In WA, the primary energy retailer is Synergy. Their feed-in tariff rate from July 2023 is set to 10 cents per kWh for exports between 3 pm to 9 pm, and 2 cents per kWh for electricity exported at any other time. After checking your retailer's rates, determine the amount of extra electricity your solar system feeds back into the grid.

Is Synergy a retail energy business?

Synergy is a retail energy business, so the numbers must provide a level of profitability, regardless of the energy supplied from the grid. Below is a brief comparison of the three main tariffs available in 2024/25: Your energy consumption knowledge: Easy

Net metering is a billing mechanism that credits solar energy system owners for the electricity they add to the grid" according to the Solar Energy Industries Association (SEIA). Net Metering is short for Net Energy Metering (NEM). ...

If you've decided to install a rooftop solar photovoltaic system (PV), battery system, or other distributed energy resource system, you'll need to apply to Synergy to export into the grid and Western Power to connect it to the grid. ...

## How much does synergy pay for solar power

The Synergy solar feed-in tariff (or DEBS - Distributed Energy Buyback Scheme) is minimal compared to alternative states in Australia where variable energy markets and increased competition exist. Nevertheless, there ...

The processes of manufacturing, transporting and installing solar panels and solar technology involves creating carbon emissions - but solar is definitely a cleaner, greener form of energy, especially when compared with other ways ...

If you're looking for ways you could reduce your electricity costs or invest in renewable energy options, a solar PV system might be right for you. We're here to help you make sense of solar. ... Synergy's Energy Efficient Home experience. Your home; Help & advice. My Account ... We pay our respects to all members of the Aboriginal ...

A commonly sized 6kW Solar PV System would cost between \$4,000 and \$6,000 in most Australian states, while a 10kW system typically falls between \$7,500 and \$10,500.. Premium Solar Panel Costs in Perth (March ...

It is so abundant that Synergy is offering the cost of electricity during peak solar production periods at a quarter (8.4050 cents/kWh) of the Home Plan A1 tariff price. Here's ...

Under both REBS and DEBS, a solar PV system with total solar panel capacity of up to 6.6kW and an inverter capacity of up to 5kVa is deemed eligible to receive the buyback ...

How much you could save depends on your energy consumption. Unless you have a battery or storage device, the solar power you generate (which occurs during the day) also needs to be used during the day. So, if you're using heavy appliances at night, your solar panels won't help to power these, and you won't be maximising your solar investment.

We will ensure any plan is fair and reasonable, by taking into account information about your capacity to pay and any debt owed to Synergy. This is known as a payment arrangement. With a payment arrangement in place, you could pay ...

To install a solar power system you'll need to have a bi-directional energy meter that is capable of separately measuring and recording electricity flows in each direction - how much energy you consume from the grid vs. how much excess energy you export back to the grid (thanks to your solar system).

If you're looking for ways you could reduce your electricity costs or invest in renewable energy options, a solar PV system might be right for you. We're here to help you make sense of solar. ... National Energy Bill Relief Plan. Synergy ...

## How much does synergy pay for solar power

Power outages can be caused by a range of factors including weather conditions, damage to power infrastructure and load imbalances in the electricity system. In terms of solar power, the ups and downs of solar generation can be one of the challenges of keeping the electricity system in balance, especially at certain times of year.

How much you'll get paid for exported solar energy in Western Australia. Regularly updated WA Feed In Tariff details showing current ...

For the initial cost of \$118.25 (\$105.93 + \$12.32) to apply and ensure the correct metering, you can receive 10c for each unit (kWh) exported by your solar energy system during the peak demand period (between 3 pm and ...

DEBS is offered to eligible households, not-for-profit, and educational institutions who install a new rooftop solar PV system, battery system or distributed energy system with an inverter capacity of 5kW or less and those customer types who ...

Each year, solar panels get more and more efficient --that is, they produce more power per square foot. As of 2025, the most popular solar panels can produce about 450 watts of electricity when they're in full sunlight. If you ...

Here in WA, for almost all households, Synergy is the only residential electricity provider in the main electricity network that covers Perth, the South West Interconnected System (the SWIS). This makes it much easier to compare your Synergy power bill to other households in the SWIS. The average electricity bill for Synergy customers

The advantage of solar PV in NSW is that it decreases your power bill by around \$400 per year per kW of solar energy thus installing an 8kW solar system may save up to approximately \$3,400 per year, or \$850 on the ...

How much does it cost to apply for the Distributed Energy Buyback Scheme (DEBS)? There's a \$12.32 fee (inclusive of GST) for your application to participate in the Distributed Energy Buyback Scheme (DEBS).
