

How does a solar PV rebate work?

For example, if your solar PV system was installed before December 31, 2022, installation costs totaled \$18,000, and your state government gave you a one-time rebate of \$1,000 for installing the system, your federal tax credit would be calculated as follows:

How much does a solar rebate cost?

In some areas, solar rebates can provide over \$5,000. Rebates also sometimes come with requirements. You may only be able to select specific equipment, or there could be a maximum or minimum system size restriction. You might only be able to work with certain solar installers that the rebate program supports.

Am I eligible for a solar or battery rebate?

You may be eligible for a solar or battery rebate depending on your location. Some states and territories allow you to apply for a rebate on top of an interest-free loan. These can complement one another and further reduce the cost of your system. You will still be able to collect small-scale technology certificates (STCs) under the Small-scale Renewable Energy Scheme (SRES).

What are the amounts for state solar tax credits?

State solar tax credits vary in amount, usually being a percentage of the total cost of the system. Almost all state tax credits have a maximum, with current amounts between \$500 and \$5,000, depending on the state. They can be claimed in addition to the federal government's investment tax credit.

What are the most popular solar incentives & rebates?

The federal solar tax credit, also known as the solar investment tax credit (ITC), is one of the most popular solar incentives and rebates currently available. It incentivizes homeowners to purchase a solar power system by reducing the amount of federal taxes owed. Here are eight of the most popular solar incentives and rebates.

Can a solar tax credit be combined with solar incentives?

Yes, the solar tax credit can be combined with solar incentives from your state, local government, or utility provider. For example, New York State also offers a 25% tax credit which can be used in addition to the 30% federal solar tax credit.
