

How do I choose the best way to use solar electricity?

Before deciding on the best way to use solar electricity at home, assess the potential solar energy that can be produced at your address. Because PV technologies use both direct and scattered sunlight to create electricity, the solar resource across the United States is ample for home solar electric systems.

How do I choose the right solar panels for my home?

Make sure you have enough roof space for the number of panels you need. Larger homes typically require more panels to meet their energy needs. Solar power offers a bright future for homeowners looking to reduce their energy costs and environmental impact.

Are solar panels right for my home?

We have the answers to all your burning questions to help you decide if solar panels are right for your home. Solar panels can generate cheap and clean energy. Here is everything you need to know. Throughout the country, residential solar panels have become an increasingly popular option for generating energy for homes.

How do I Go Solar for my home?

The most common way to go solar for homeowners is the installation of panels on their roofs. These systems can be purchased directly through an installer (or assembled for the DIYers) as a large cash purchase or through relatively affordable financing (such as a 1.99% APR 15-year loan).

How to install home solar panels?

After securing the mounts, place the home solar panels onto the brackets and fasten them with bolts. Double-check that you installed the panels at an angle to capture the maximum amount of sunlight. With the panels installed, the next step is to wire the system. Connect the panels with the wiring, following the manufacturer's instructions.

Should you consider solar energy for your home?

Before choosing solar energy for your home, homeowners should investigate their energy use and consider potential efficiency upgrades. This includes being aware of your total electricity usage and considering low-cost and easy-to-implement efficiency measures.

When companies advertise "free solar panels" or "no-cost solar programs," they're often referring to solar leases or solar PPAs. Under these solar financing arrangements, a solar company will put a solar panel system on ...
