

How do I go solar?

Here's our quick guide to going solar. First, determine if you're a good fit based on your energy costs, home and roof setup, and location. Compare multiple quotes when going solar to find the right system at a competitive price.

How does solar energy work?

Solar energy works by harnessing the sun's energy to power homes. Since 2008, hundreds of thousands of solar panels have popped up across the country as an increasing number of Americans choose to power their daily lives with the sun's energy.

How can I get solar power?

To get powered by sunshine, choose a solar installer. An installer can help you determine whether your roof is suitable for solar panels. Begin by researching qualified, insured installers online or asking for recommendations from people who've gone solar.

Why should you go solar?

The more electricity your household uses, the higher your energy bills and the more you could save by going solar. Other factors contributing to the amount you pay for energy include where you live, the size of your home, its energy efficiency and your utility rate plan.

How can I get a great deal on solar panels?

The best way to get a great deal on your solar panel system is to compare quotes based on cost, equipment, and installer reputation. Instead of relying on a single quote from a door-to-door salesperson or a cold call, compare multiple offers to feel confident in your solar decision.

Should I add a solar energy system to my roof?

You may be considering adding a solar energy system to your home's roof. While there's no one-size-fits-all solar solution, here are some resources that can help you figure out what's best for you. Consider these questions before you go solar.
