Will GM Build EV charging stations?

Beyond the public investment in rolling out charging infrastructure,GM (whose brands include Chevrolet and Cadillac) has committed \$750 million in private capital to the development of EV charging stations. It is partnering with car dealerships and other companies.

How many EV charging stations are there?

Today,there are more than 64,000public EV charging stations in the U.S.,according to the U.S. Department of Energy's Alternative Fuels Data Center. Experts say that the nation needs many times more to make a smooth,sustainable,and equitable transition away from gas-powered vehicles -- and to minimize the anxiety surrounding EVs.

What is the cost of charging an EV at home?

Charging an EV at home is substantially cheaperthan using DC fast-charging,typically costing around one-third as much. On average,an EV charger has an up-front cost of between \$400 and \$500. You'll want to charge at home as much as possible for convenience and cost savings.

Why are EV owners frustrated with a lack of charging locations?

BOSTON -- New data-driven research led by a Harvard Business School fellow reveals a significant obstacle to increasing electric vehicle (EV) sales and decreasing carbon emissions in the United States: owners' deep frustration with the state of charging infrastructure, including unreliability, erratic pricing, and lack of charging locations.

Are EV charging stations reliable?

One of the study's main findings,discovered using customized artificial intelligence (AI) models trained on EV review data,is that charging stations in the U.S. have an average reliability score of only 78%,meaning that about one in five don't work. They are,on average,less reliable than regular gas stations,Asensio said.
