What does UL Solutions do for battery product manufacturers?

As a global leader in battery safety testing and certification,we help battery product manufacturers demonstrate product safety, quality and performance gain accelerated access to the global market. UL Solutions provides advisory services that help integrate energy storage into renewable energy projects for clean, reliable energy generation.

What kind of tests does ul solutions offer for battery technology?

UL Solutions' services cover the energy storage industry's entire value chain. We are a leader in safety testing and certification for battery technology. Our performance testing offerings include competitive benchmarking, charge/discharge and overcharge tests, as well as environmental and altitude simulation for system integrators.

What does UL Solutions do?

UL Solutions provides advisory services and battery safety testing and certification to help integrate energy storage into renewable energy projects and accelerate battery product manufacturers' access to global markets.

Why do you need a battery & energy storage service?

Our services are designed to help reduce the complexities associated with creating energy storage products. We support you in your drive to deliver safer and better technologies to the global marketplace. Battery and energy storage systems have distinct public and product safety concerns.

What is industrial battery & energy storage testing & certification?

Our industrial battery and energy storage testing and certification services can help you address the complexities associated with creating, storing and repurposing battery and energy storage products.

Are battery and energy storage systems safe?

Battery and energy storage systems have distinct public and product safety concerns. Our testing and certification services and expertise help you understand how your products will perform under anticipated usage and various hazardous scenarios -- including abuse -- during discharge and recharge cycles.

EnerSys®, the global leader in stored energy solutions for industrial applications, is taking industrial, electric-powered vehicle safety to the next level by obtaining UL 2580 Listing ...

UL Solutions helps e-mobility manufacturers pursue their innovative battery and charging technologies with confidence. ... including batteries and energy storage, to offer comprehensive solutions and guidance. ... This ...

Battery energy storage systems (BESS) play a crucial role in integrating more renewable energy, enhancing
