

How do I connect a Huawei inverter to homewizard?

The user agrees to understand that HomeWizard can in no way be held responsible for the availability and correct functioning of third-party APIs. Go to Settings > Meters > Add device > Huawei and enter your login credentials. The app will now connect to the inverter.

How do I connect a Huawei meter to my inverter?

Go to Settings > Meters > Add device > Huawei and enter your login credentials. The app will now connect to the inverter. If your graph shows incomplete or no data, make sure that your inverters are in the same installation. You can check this by going to the Huawei app.

How do I add my Huawei solar inverter to the energy app?

To add your Huawei solar inverter to the Energy App you need your Huawei Username and Password. These are the same credentials used for the Huawei FusionSolar for monitoring your solar panels. For this functionality Energy+ and a Huawei inverter with an internet connection are required. The API data is available in the Energy app per 15 minutes.

How do I Activate my Huawei installation account?

If you have obtained the login account and password from your installer or Huawei service engineer, enter the account and password, and click Log In to go to the home page. If you do not have an account, click Installer Registration, fill in the registration information, and activate the account with the email verification code sent to you.

Do I need a Huawei inverter to use energy+?

For this functionality Energy+ and a Huawei inverter with an internet connection are required. The API data is available in the Energy app per 15 minutes. It is not possible to view the live data as with the HomeWizard kWh meter or P1 meter. The data is only read from the moment of connecting, there is no support for historical data.

How do I reset the inverter WLAN password?

How can I reset the inverter WLAN password using the FusionSolar app? Access the Commission Device screen on the FusionSolar app, choose Settings > Communication configuration > Inverter WLAN settings, and set the WLAN password.
