

Can a Huawei inverter connect to a 2.4Ghz router?

This article discusses the common problem when commissioning residential and commercial inverters (SUN2000L/L1 models,M0/M1/M2/M3 models). Huawei inverters rely only on 2.4GHz frequency,which means they can connect only on the 2.4GHz routers. Nowadays,more and more routers support both frequencies (2.4GHz /5GHz).

Why does my mobile phone not connect to the inverter Wi-Fi network?

The Wi-Fi chip of the mobile phone is incompatible with the inverter Wi-Fi network. Cellular Data. If the connection to the inverter Wi-Fi network still fails,restart the mobile phone. Choose Settings > Wi-Fi on the phone. Select the corresponding inverter Wi-Fi network,and manually configure the IP Address,Subnet Mask,Router,and DNS servers.

How do I Fix my inverter Wi-Fi Connection not working?

Cellular Data. If the connection to the inverter Wi-Fi network still fails,restart the mobile phone. Choose Settings > Wi-Fi on the phone. Select the corresponding inverter Wi-Fi network,and manually configure the IP Address,Subnet Mask,Router,and DNS servers. After the configurations are complete,reconnect to the inverter Wi-Fi network.

Which Huawei inverters are compatible with fusionhome?

The following guide is applicable for all Huawei WIFI-enabled inverters,including the SUN2000 and SUN2000L and SUN2000L Hybrid models. Please download the FusionHome app (this is a separate app from FusionSolar and NetEco) from either Google Play or Apple App Store.

Why is my fusion solar inverter not connecting to the router?

The inverter is connected to the router but failed to connect to the FusionSolar management system. You have access to router settings. First, you need to check the connection settings to the monitoring system. Step 1: Click Settings > Communication parameters > Management system settings The domain name should be checked and set.

Why is my smart dongle not connected to Huawei fusionsolar smart PV management system?

The devices connected to the Smart Dongle are not connected to the Huawei FusionSolar Smart PV Management System properly. Check whether the inverter software version meets the requirements. If not,upgrade the inverter to a specified version or later. Check that the RS485 communications cables are connected properly.
