

How to charge Hyundai Ioniq Electric?

Charging is possible by using a regular wall plug or a charging station. Public charging is always done through a charging station. How fast the EV can charge depends on the charging station (EVSE) used and the maximum charging capacity of the EV. The table below shows all possible options for charging the Hyundai IONIQ Electric.

Will Hyundai Ioniq 9 charge Tesla Superchargers?

Hyundai specifically designed the adapter for reliable charging at V3 Tesla Superchargers and other NACS DC fast-charging stations. Like the upgraded 2025 IONIQ 5 and Hyundai's first three-row electric SUV, the IONIQ 9, all new EVs will include a built-in NACS port for charging at Tesla's Superchargers.

Does Hyundai Ioniq 5 have NACS ports?

Like the refreshed 2025 Hyundai IONIQ 5, which already has access to the Tesla Supercharger network, all new and significantly updated Hyundai EV models will feature built-in NACS ports. The NACS ports eliminate the need for an adapter to access Tesla Superchargers and other DC fast charging stations.

Is the Hyundai Ioniq eligible for the EV ChargePoint grant?

The Hyundai IONIQ is only eligible for the EV chargepoint grant, but you will benefit from £0 road tax and £0 London Congestion Charge. *On-the-road price including Plug-in Grant, if applicable. *For further information including how to calculate personal BiK liabilities, please visit our Electric Car Tax guide.

Is the Hyundai Ioniq Electric a new model?

The model shown on this page is the successor of the Hyundai IONIQ Electric, which was available to order from October 2016 until September 2019. The previous model had 60 km less range, same acceleration and was 4% more energy efficient. All details and specs of the Hyundai IONIQ Electric (2019-2022).
