

Is it possible to install solar panels in Idaho?

Installing solar panels in Idaho is a great idea. With a solar energy system on your roof, the need for electricity from the power company can be significantly reduced. Solar power in Idaho can offset your electric bill and go solar for less than you think thanks to state solar rebates.

Does Idaho Power have a solar system?

Idaho Power customers can install solar or other renewable energy systems to offset some of their energy use. Systems that are connected to the grid are called "interconnected." With an interconnected system, energy flows two ways between the electrical grid and your home.

How many solar projects does Idaho Power own?

Idaho Power has contracts to buy energy from 27 solar projects in Idaho and Oregon. Of these, 21 projects are currently online and represent a combined capacity of 476 megawatts (MW). Projects still under development are scheduled to add 377 MW. Idaho Power does not own or operate these projects.

What is the Idaho State solar program?

The Idaho State Solar Program is a financial incentive program designed to attract solar installations on commercial and residential buildings. It offers rebates and incentives on a first-come, first-served basis.

How do I choose a solar company in Idaho?

To choose a solar company in Idaho, consider one that offers a variety of financing options. For instance, Blue Raven Solar provides two financing plans -- BluePower Plus+ and SmartStart -- with \$0-upfront options for 18 to 42 months.

What does Idaho Power do?

Idaho Power uses small PV panels in its daily operations to power equipment, such as checking water quality, measuring stream flows, and operating cloud-seeding equipment. It also participates in the Solar 4R Schools program and donated a 2.7-kilowatt array (36 75-watt PV modules) to the Foothills Learning Center.
