

Does Idaho have solar power?

Although wind energy contributes approximately 17% of Idaho's electricity, the Gem State and solar development have not exactly gone hand-in-hand in recent years. That said, the state's renewable energy capacity is about to increase immensely, thanks in large part to new solar installations coming online.

How many solar projects does Idaho Power own?

Idaho Power has contracts to buy energy from 27 solar projects in Idaho and Oregon. Of these, 21 projects are currently online and represent a combined capacity of 476 megawatts (MW). Projects still under development are scheduled to add 377 MW. Idaho Power does not own or operate these projects.

Does Duke Energy have a solar project in Idaho?

In January of last year, Duke Energy started commercial operations at the 120 MW Jackpot Solar project in Twin Falls County, which provides energy to Idaho Power through a 20-year power purchase agreement (PPA). Jackpot is now the largest solar facility currently operating in Idaho, supplanting Grand View Solar Two.

Does Idaho have a solar farm?

(Boise Solar, a 54 MW ac solar project developed by Origis Energy. Courtesy: Origis Energy) For the first time, the Idaho State Board of Land Commissioners has voted to approve a lease for a solar farm on state-owned property.

What is the largest solar facility in Idaho?

Jackpot is now the largest solar facility currently operating in Idaho, supplanting Grand View Solar Two. In late 2025, Jackpot will likely pass the crown to the 200 MW Pleasant Valley Solar, which broke ground in Boise last summer.

What upcoming solar projects are coming to Idaho?

Other upcoming solar projects of note include Clenera's Crimson Orchard Idaho, a 120 MW solar site with 400 MWh of paired battery storage expected to be operational in Q3 2026. SEIA predicts a steady flow of utility-scale projects coming online through 2029, significantly altering the state's clean energy mix.

Combining batteries with solar enables the batteries to continue delivering energy to the grid when solar production drops off while customer demand remains high. ... Idaho ...

This is the organization's first utility-scale renewable energy project in the state and is the largest solar facility in operation in Idaho. It will provide energy to Idaho Power through a 20-year power purchase agreement (PPA). ...
