

What is a solar pump inverter?

The solar pump inverter supports AC and DC input. Come with IP20 protection, the solar pump inverter altitude is lower than 1000m, and the pump inverter works at [-10℃, 40℃]. It is usually used in agricultural water resources, desert management, grassland husbandry, and so on.

Where can I find a gd100-pv solar pump inverter product manual?

Consult ShenZhen INVT Electric Co., Ltd.'s entire INVT GD100-PV Series solar pump inverter Product Manual catalogue on DirectIndustry. Page: 1/10

What is a goodrive100-pv solar water pump?

Goodrive100-PV series are specially designed for solar water pump market. Including PV over-voltage protection, PV connect reverse warning, auto derating against over-temperature etc... Models of 2.2kW or less can be configured with the boost module, which can make the pump work in low voltage and decrease the number of solar panel.

Who is int solar?

INVT Solar is a professional solar inverters manufacturer and national high-tech enterprise. Founded in 2015, it is a wholly-owned subsidiary of INVT. It mainly offers PV inverter solutions and energy storage systems for commercial & industrial, and residential applications.

How do solar inverters work?

The inverters automatically start or sleep only after being connected to solar panel without any parameter setting. Including PV over-voltage protection, PV polarity reverse warning, auto derating against over-temperature etc, which can extend product's life. Ensure the solar power tracking efficiency reaches 99%.

What is the failure rate of IGBT in the inverter?

The failure rate of IGBT in the inverter of 7.5kW is a little high. Goodrive100-PV series are specially designed for solar water pump market. Including PV over-voltage protection, PV connect reverse warning, auto derating against over-temperature etc...
