

Will Rocky Mountain Power cut solar energy rates in Utah?

Rocky Mountain Power Inc. is looking to dramatically cut the rates it pays to rooftop solar customers in Utah for sending energy back onto the grid. Even as it transitions away from coal-fired power generation in an effort to reduce carbon emissions.

Why is Rocky Mountain Power proposing a new solar system?

Rocky Mountain Power is proposing this change to reduce the number of customers who install rooftop solar systems, according to Gallagher. The utility, which serves approximately 907,000 customers in Utah, has a total of 40,450 rooftop solar customers.

How much energy would Rocky Mountain Power have generated?

If Rocky Mountain Power had generated the same amount of electricity as the customers' rooftop solar, it would have cost them approximately \$700,000, according to the company's estimation. According to advocacy group Vote Solar, regulators should maintain the general structure of the transition program and pay customers 22.6 cents/kWh for their excess energy.

Does Rocky Mountain Power offer a solar power incentive program?

Rocky Mountain Power's incentive program requires that the batteries be charged by on-site solar power systems in order to fully qualify. Electric utility Rocky Mountain Power (RMP) is incentivizing more than 50,000 residential and commercial solar power owners within Utah to install utility-managed Sonnen batteries.

Does Rocky Mountain Power offer rooftop solar?

Rocky Mountain Power has 309 MW of rooftop solar capacity installed among its customers as of the end of 2019. This is higher than previous estimates from SEIA and Wood Mackenzie Power and Renewables.

Does Rocky Mountain Power offer net metering?

Rocky Mountain Power offers net metering or net billing compensation to customers in Idaho, Utah, and Wyoming. In Idaho, there is no overlap between service areas for Rocky Mountain Power and the state's other large energy suppliers, Avista Utilities and Idaho Power.

BOISE, Idaho -- Rocky Mountain Power continues to support the desire of customers who want to own their own power generation systems. Part of this objective is to establish a sustainable and fair program for customers who want to generate some of their own power, while keeping their connection to Rocky Mountain Power's system.

If you are planning a project over 25 kW and plan to sell power to Rocky Mountain Power, find information on qualifying facilities, grid connection requests and market-based incentives. If you have onsite solar generation, ...
