

Are solar panels worth it?

Solar panels are worth it for several reasons. They are a great source of clean energy, lower carbon emissions, reduce reliance on fossil fuels, and help you live more sustainably. Plus, you can save money on your electricity bills.

Can solar panels help you save money?

Solar panels can save you money if your state has robust net metering or you have high energy costs. If you plan to stay in your home for many years and believe the short-term energy savings and increased home value will recoup your investment, solar panels could pay off.

Is investing in solar panels a good idea?

If you're planning to stay in your home for many years and believe the short-term energy savings and increased home value will recoup your investment, solar could pay off. However, if you don't have high energy costs or your state makes it difficult to go solar, it might not be worth it financially.

How much value can solar panels add to a home?

Solar panels can add around \$15,000 of value to your home. According to the US Department of Energy's Lawrence Berkeley National Laboratory, homes with solar panels sell quicker than those without. Solar panel cost and efficiency has improved greatly over the last 10 years.

Do more solar panels cost more?

Generally speaking, a bigger system with more panels will have a higher average cost than a system with fewer panels. While cheaper solar panels may seem like the easiest way to save money on a solar system, investing in high-quality equipment usually yields greater long-term savings.
