

Is solar energy a good choice for a home?

Solar energy can be a good choice for your home as it is powered by the sun, making it earth-friendly, and your energy savings begin as electricity rates continue to rise. Let's Talk With Our Solar Experts! See if Your Home is a Good Match for Solar.

Is solar power right for my home?

Is solar power right for my home? If you want to reduce your energy bills and carbon footprint, then installing solar PV can be a good choice. There are cost, technical and lifestyle questions you will need to consider.

Why choose solar power for your home?

Solarwatt Chief Executive Detlef Neuhaus said that, given progress in digital energy management and falling solar PV costs, it had become easier and more economically attractive to widen the applications for home-produced energy.

Is solar energy a viable option for my home?

Here are some tips to help you decide if solar energy is a viable option for your home. According to the California Energy Commission, a solar system needs unobstructed access to the sun's rays for most or all of the day. The easiest way to check your home for solar viability is by typing your address into Google's Project Sunroof.

Are solar panels worth it?

Saving money and the planet through solar energy has a lot of appeal, but not every home is the ideal candidate. Your home needs to get plenty of sunlight, have a roof that is big enough and faces the right direction, and you need to pay enough for electricity to make solar panels worthwhile.

Is your home a good candidate for a solar system?

If you feel confident that your home is a good candidate, it is time to contact a professional. Although you can find a rough estimate of the size of the solar system you need online, an exact number depends on a lot of different factors that most people won't be able to figure out on their own.
