

Who is island solar power?

ISLAND SOLAR POWER Swimsol provides affordable and durable marine floating & rooftop solar PV systems for the tropics, where land space is limited. We make solar energy a hassle-free experience by handling all the tech & maintenance. We work with ultra-luxury resorts and small businesses alike - always aiming to provide great service.

Can your home be a solar energy island?

However, your home can be a solar energy island with renewable energy available during a power outage or blackout. Integrating a solar inverter with island mode and battery storage will give you this capability while maintaining a connection to the grid.

What is solar islanding?

Solar islanding is when a home solar power system continues to generate electricity even though the grid is down. Many people would consider this a good thing, as your home still has power from your solar panels while everyone else has no power.

Why should you choose island solar?

Store your free energy from the sun to be used at anytime. No home is alike - and the solar system powering your home should be unique too. Island Solar's proven solar design and installation process analyses your power requirements and creates a custom system ideal for your home, then we install it fuss-free.

What if solar islanding wasn't prevented?

Here's what could happen if solar islanding wasn't prevented: The local grid goes down. However, your grid-tied solar power system still produces electricity. Once the panels have supplied electricity to your home, any excess energy goes into the grid.

What is rooftop solar for Islands?

Rooftop solar for islands Swimsol provides affordable and durable marine floating & rooftop solar PV systems for the tropics, where land space is limited. We make solar energy a hassle-free experience by handling all the tech & maintenance. We work with ultra-luxury resorts and small businesses alike - always aiming to provide great service.
