

What are the benefits of solar power in Kansas?

Of course, the number one benefit of solar power in Kansas is the energy savings you'll enjoy, and the reduction on your energy bill is so substantial that it is expected to pay off your system and then some.

How much do solar panels cost in Kansas?

After the full federal solar investment tax credit (ITC), the residential solar panel system is \$16,317 in Kansas, which is cheaper than in many other states. Kansas also has a property tax incentive to make going solar even more appealing for homeowners in the state. The average federal solar investment tax credit value is \$6,993 in Kansas.

Are solar panels a good investment in Kansas?

Kansas also has a property tax incentive to make going solar even more appealing for homeowners in the state. The average federal solar investment tax credit value is \$6,993 in Kansas. A solar property tax exemption means that your property tax bill won't go up if your solar panels increase the value of your home.

Do solar panels increase property tax in Kansas?

A solar property tax exemption means that your property tax bill won't go up if your solar panels increase the value of your home. On average, Kansas homeowners with solar panels get estimated net savings of \$21,455 over 25 years. The federal solar investment tax credit (ITC) is the biggest factor in reducing the cost of going solar in Kansas.

How long do solar panels last in Kansas?

One of the most useful metrics for determining how valuable solar will be for your home is the solar panel payback period, which is the time it takes your solar panels to provide enough energy savings to offset the entire system expense. In Kansas, this time period is typically between 9 and 15 years, with an average of around 12 years.

How popular is solar power in Kansas?

Solar power is certainly not as popular in Kansas as it is in most other states, but the market is growing. Residential solar conversions have grown year over year for the past decade, and utility-scale and the commercial solar sector have also grown considerably over the past few years.
