

Does My K-start inverter still have warranty?

If your inverter is less than 5 years old, there's a good chance you still have warranty (assuming the manufacturer is still in business). Not sure if the inverter is faulty, or if it is actually reporting a fault elsewhere in your solar system? See below for the error codes recognized with your K-Start inverter/solar system.

How do I install a KSTAR inverter?

inverter installation location. Kstar recommends using a sun shade minimizing direct sunlight when the ambient air temperature around the unit exceeds 104°F/40°C. Install on a wall or strong structure capable of bearing the weight. Install vertically with a maximum incline of +/-5°. If the mounted inverter is tilted to an angle

What causes a KSTAR device to fail?

The device operates in harsh environment, as described in this manual. The fault or damage is caused by installation, repairs, modification, or disassembly performed by a service provider or personnel not from KSTAR or his authorized partner. The fault or damage is caused by the use of non-standard or non-KSTAR.

What happens if KSTAR is faulty?

The customer shall give KSTAR or his partner a reasonable period to repair the faulty device. The free warranty period for the whole machine/components has expired. The device is damaged during transport. The device is incorrectly installed, refitted, or used.

How do I Fix an inverter error?

(1) Restart the inverter and wait until it functions normally. (2) Contact customer service if error warning continues. (1) Restart the inverter and wait until it functions normally. (2) Contact customer service if error warning continues. (2) Contact customer service if error warning continues.

How to check if inverter fault exists?

Please check the setting of input mode 2. Disconnect PV input and restart the inverter and check whether fault still exists. Please contact the dealer. Please check the setting of input mode. Disconnect PV input and restart the inverter and check whether fault still exists. The fault still exists after the restart.
