

Who is La solar factory?

The southern California-based LA Solar Factory entered the solar panel manufacturing industry to become vertically integrated, allowing them to offer more competitive system prices, be better protected from supply chain constraints, and offer a competitive warranty.

What are the benefits of solar power in Los Angeles?

Solar also brings economic benefits for LA as a catalyst for creating jobs and stimulating the green economy. Local solar projects also support the reliability of LADWP's power grid. They are considered "distributed generation" and function as mini power plants that generate energy right where it is used.

Who is LA Solar Group?

LA Solar Group is a dynamic organization founded in 2010 with a commitment to its clients. It started as a small operation with just one van and one crew, but has since grown to employ dozens of people and complete hundreds of projects weekly.

How efficient are La solar factory solar panels?

The efficiency of your LA Solar Factory solar panels will vary depending on the specific model (and wattage) that you choose for your system. LA Solar Factory panel efficiency ranges from 17.52% to 21.28% - for contrast, SunPower has the most efficient solar panels on the EnergySage Marketplace at 22.8%.

How many solar panels does La solar install?

LA Solar has been installing solar panels since they were founded in the Los Angeles area in 2011, with current installations spanning three states: California, Nevada, and Texas. During the past 12 years, they've installed over 25,000 systems and approximately 625,000 solar panels.

Where does La solar factory install solar panels?

Location: LA Solar Factory is currently only operating as an installer in Los Angeles, the Bay Area, Nevada, and Texas, although some other installers may install their solar panels in other states.
