

Does the Logitech wireless solar keyboard K750 have a battery?

Would you like to tell us about a lower price? Battery hassles are a thing of the past with the solar-powered Logitech Wireless Solar Keyboard K750. It charges itself whenever there's light,so you can say good-bye to batteries,power bricks and charging cables.

Is the Logitech wireless solar keyboard eco-friendly?

The affordable Logitech Wireless Solar Keyboard K750 boasts two solar panels that power the keyboard while you type,and other eco-conscious features include PVC-free construction and fully recyclable packaging.

Why should you buy a Logitech keyboard?

Combining the best of traditional keyboards,laptops and a Logitech-only concave key cap design,you'll enjoy faster,quieter,feel-good typing-hour after hour. Plus,you'll get Logitech Advanced 2.4 GHz wireless and the tiny Logitech Unifying receiver. This product has sustainability features recognized by trusted certifications.

Is Logitech K750 a smart keyboard?

The Logitech K750 Solar Keyboard is a wonderful example of smart design,innovation and practicality all combining to make a class leading product. Given the low power consumption of keyboards it is surprising in hindsight that a truly independent,high class wireless design had yet to surface.

How does Logitech K750 solar work?

Here is where the magic happens. Much like any other solar device,the K750 uses light (both sunlight and artificial light) to charge its internal (but removable) battery. Where it differs is what Logitech says this solar technology can achieve. In contrast to the typically weak stamina of most solar products,the K750 is exceptional.

What is a Logitech K750 keyswitch?

This type of keyswitch also allows Logitech to reduce the thickness of the keyboard chassis to just one-third of an inch. The standout features on the K750 are obviously the dual solar panels that sit on either side of the logo branding on top of the keys.
