

Is the Logitech wireless solar keyboard eco-friendly?

The affordable &Logitech Wireless Solar Keyboard K750& boasts two solar panels that power the keyboard while you type, and other eco-conscious features include PVC-free construction and fully recyclable packaging.

Does the Logitech wireless solar keyboard K750 have a battery?

Would you like to tell us about a lower price? Battery hassles are a thing of the past with the solar-powered Logitech Wireless Solar Keyboard K750. It charges itself whenever there's light, so you can say good-bye to batteries, power bricks and charging cables.

How does Logitech K750 solar work?

Here is where the magic happens. Much like any other solar device, the K750 uses light (both sunlight and artificial light) to charge its internal (but removable) battery. Where it differs is what Logitech says this solar technology can achieve. In contrast to the typically weak stamina of most solar products, the K750 is exceptional.

Is Logitech advanced 2.4 GHz wireless sustainable?

Plus, you'll get Logitech Advanced 2.4 GHz wireless and the tiny Logitech Unifying receiver. This product has sustainability features recognized by trusted certifications. Carbon emissions from the lifecycle of this product were measured, reduced and offset.

Why should you buy a Logitech keyboard?

Combining the best of traditional keyboards, laptops and a Logitech-only concave key cap design, you'll enjoy faster, quieter, feel-good typing-hour after hour. Plus, you'll get Logitech Advanced 2.4 GHz wireless and the tiny Logitech Unifying receiver. This product has sustainability features recognized by trusted certifications.

Is Logitech a good brand?

The descriptive name tells you the basics. It is a solar powered keyboard. What the fairly soulless branding doesn't imply, however, is what a remarkably good job Logitech has made of it. The positive impressions start the moment you begin unboxing. Logitech has used minimalist recyclable packaging and it could almost fit through your letterbox.
