Where is the Megalim Solar thermal power plant located?

The Megalim solar thermal power plant, a joint venture of BrightSource, GE Renewable Energy and the Noy Fund, said on 10 April, that it has begun commercial operation in Israel. The Ashalim Solar Thermal Power Station, located in Israel's Negev desert, is one of the largest projects of its type in the world.

Who owns Megalim Solar power?

Megalim Solar Power LTD is a B.O.T. concession company owned by Noy Fund(74.95%) and GE Renewable Energy (25.05%). The company has won the tender by the State of Israel for the construction, planning, financing and operation of a solar-thermal power plant by Solar Tower Technology.

How will the Megalim Solar power plant help the government?

At the same time, it will avoid 110,000 tons per year of CO2 emissions, helping the government achieve its goal of generating 10 percent of its electricity from renewable sources by 2020. The Megalim thermo-solar station will provide power to about 50,000 households at peak.

What is Ashalim solar power?

The Ashalim solar complex is an important element of Israel's Commitment to produce 20% of its electricity from renewable sources by 2025, rising to 30% by 2030. Megalim Solar Power LTD is a B.O.T. concession company owned by Noy Fund (74.95%) and GE Renewable Energy (25.05%).

How much power will the Megalim thermo-solar station provide?

The Megalim thermo-solar station will provide power to about 50,000 householdsat peak. It is one of three facilities in Ashalim that are expected to produce about 2 percent of Israel's electricity capacity.

Why is Megalim a renewable power station?

Since its completion,Megalim's power station is producing renewable energy power which contributes to CO2 emissions reductioninto the atmosphere in a scale of 120,000 tons per annum, and which is an equivalent to the annual needs of about 40,000 households, under a 25-year Power Purchase Agreement with the State of Israel.

Design, construction and operation of a solar thermal power plant with installed capacity of up to 121MW on a build-operate-transfer (BOT) basis. It will be located in the ...

The Israel-based company Megalim Solar Power, whose shareholders include General Electric, is currently building a solar power tower in the Negev desert. The tower will be over 240 meters tall and will generate up ...

The Ashalim power station "s concentrated solar power (CSP) technology is using more than 55,000 computer-controlled heliostats or ...
