

Does Michigan require homeowners to install solar panels?

The Michigan legislature recently enacted the Homeowners' Energy Policy Act, 2024 PA 68, which imposes new requirements on Michigan homeowners associations with respect to installing solar panels and other energy-saving improvements.

Does Michigan need more wind and solar power?

Michigan legislators last year passed a law requiring state utilities to get 100% of their power from clean sources by 2040. To achieve that goal, Michigan may need to dedicate 209,000 more acres of land to wind and solar development. But local opposition is stalling wind and solar projects across the state.

Can Michigan approve large wind and solar farms over local objections?

(Bridge photo by Dale Young) A controversial law that allows the state to approve large wind and solar farms over local objections is now in effect. The law, Public Act 233, went into effect Friday, Nov. 29, and was among the more contentious aspects of a suite of reforms enacted last year to speed Michigan's clean energy transition.

What are Michigan's New solar bills?

Two bills introduced into the Michigan Legislature Wednesday aim to create more favorable conditions for utility customers who want to install solar panels and sell the excess energy back to the grid.

How can Michigan governments become solar-ready?

Becoming Solar-Ready: A Guide for Michigan Governments, produced under a grant to the Clean Energy Coalition from the MEDC--Michigan Energy Office, includes sample permitting checklists, board and council resolutions, and planning/zoning language. SolarAPP+ is a platform tool that automates permitting of solar energy for local governments.

Are Michigan's Township and County solar and wind ordinances a problem?

The House passed them last week along party lines. Proponents argue Michigan's patchwork of township and county solar and wind ordinances is the biggest obstacle to a more rapid buildout of its renewable energy generation fleet.
