

What is a 'million-mile' Battery?

Reuters on Thursday published a report citing sources close to the company's battery program, and it largely falls in line with past evidence we've heard about this so-called 'million-mile' battery -- that's a million miles of total use, not range on a single charge.

Is the 12 million mile Battery legit?

The 12 Million Mile Battery is legit. As we've seen the battery is in desperate need for improvements and any company that successfully does that will be perfectly placed to soar. The caveat is that many companies have tried and failed and it will be interesting to see how Paul's pick does things differently.

How long does a CATL EV battery last?

CATL launched its newest battery, the Tianxing Bus version, opening a new era for buses. With "the highest energy density in the bus industry," CATL claims its new EV battery can last 15 years and 1.5 million kilometers (932,000 miles). The world's largest EV battery maker is not slowing down.

Does CATL's new Tianxing battery improve energy density?

CATL said it improved the energy density by 22% compared to the previous generation. With 175 Wh/kg, CATL claims its new Tianxing Bus battery leads the industry. The new Tianxing battery is designed specifically for buses and can last up to 1.5 million km (932,000 miles) and 15 years.

What is CATL's new target EV battery market?

Its new target is commercial vehicles. According to the latest SNE Research data, CATL accounted for 31.6% of global EV battery sales in the second quarter. China's BYD was second with 14.7% of global battery sales. As of August 2024, CATL held a 37.6% share of the global EV battery market

Which EV battery company has the most EV sales in 2024?

China's BYD was second with 14.7% of global battery sales. As of August 2024, CATL held a 37.6% share of the global EV battery market. According to a recent report, CATL is adding two more factories to its six already planned globally. CATL is planning new factories in Germany, Thailand, Hungary, Indonesia, and two in the US (Ford and Tesla).

More 'Million-Mile' Batteries News: CATL Now Promises 2-Million Kilometer, 16-Year Battery Technology Reuters" Article On Tesla's Million-Mile Battery Needs Clarification

New-gen LFP bus batteries last 15 years, CATL claims--20% longer; ... Further, a Long Life Edition was pegged at 15 years or 2.8 million km (1.74 million miles), with battery ...

Tesla battery supplier CATL says it is ready to produce an electric car battery with a lifespan of 16 years or 1.2 million miles. The breakthrough could lead to significantly cheaper electric...

China's Contemporary Amperex Technology Co., Limited, better known by its acronym CATL, wants to calm any worries you may have about battery lifespan. The largest EV battery manufacturer just...

Tesla China's battery supplier Contemporary Amperex Technology Co. Ltd. (CATL) has released details about its million-mile battery. Company chairman and founder Zeng Yuqun revealed in an ...

The million-mile battery technology is separate from another CATL initiative that Tesla is reported to also take advantage of, being cobalt-free lithium iron phosphate batteries ...

Samsung is developing a battery with a solid-state electrolyte that enables a 600-mile range, and CATL is releasing a bus battery with a one million-mile lifespan. News Oct 23, 2024 by John Nieman

News today is that CATL (Contemporary Amperex Technology), the largest battery producer in the world (by far), has a new battery that it's saying has a service life of 1.5 ...

The US-made 2170 form factor battery cell which is used in the Tesla Model Y and Model 3 vehicles has a lifespan of 1500 cycles or 465,000 miles (748,345 km) have mainly been made by Panasonic at Tesla's ...

First out of the gates is China's CATL, a supplier of batteries to multiple automakers including BMW, Geely, Tesla, Toyota and Volkswagen. CATL is ready to start production of batteries...

CATL has announced a new type of battery cell that exhibits no degradation after 1,000 cycles. The cells, which will be initially utilized by bus manufacturer Yutong, owe their extended lifespan to a technique known as pre-lithiation. This ...

Bloomberg says that CATL will also offer batteries with a large lifespan: 16 years or 2 million km (1.24 million mi). ... After SVolt announced its "almost million-mile" batteries back in May ...

The Tectrans T Long Life Edition leads the industry with a projected lifespan of up to 15 years and over 1.7 million miles (2.8 million kilometers). The battery is available in various capacities ...

Now, in an interview with Bloomberg, CATL CEO Zeng Yuqun made clear the hunt for that first grail is over, telling the outlet, "If someone places an order, we are ready to ...

CATL chairman Zeng Yuqun told Bloomberg that his company has a battery pack ready for electric vehicles that will last as much as 1.2 million ...

Tesla battery supplier CATL says it is ready to produce an electric car battery with a lifespan of 16 years or 1.2 million miles. The breakthrough could lead to significantly cheaper electric cars ...

As Bloomberg reports, the claim of a million-mile battery comes directly from CATL chairman Zeng Yuqun, who says the battery his company developed has a lifespan of 16 years and will power a ...

CATL, the world's leading power battery manufacturer, has unveiled a new battery designed specifically for electric buses. This new battery boasts a remarkable 15-year lifespan or a staggering 1.5 million km (over ...

CATL's million-mile battery boasts zero degradation after 1,000 cycles, challenging conventional notions of battery lifespan. This remarkable feat opens up new possibilities for ...

Dahn, a world-renowned battery scientist and NSERC/Tesla Canada Chair, presented the exciting news during his keynote presentation (titled: More than a million miles and a century of life) at the international ...
