

How long does it take to build a solar power system?

Dead Simple Solar Power System! Easy to Build! This took me 25 minutes Turn off the battery and make all connections. Then add solar and turn everything on! It does not get easier than this. You can throw this into a RV or Van, or even a closet. Easy to move and very powerful. The battery cables come with the EG4 all in one.

Do all-in-one 12/24/48V solar power packages work?

All-in-One 12/24/48V Packages - DIY Solar Power - Made Easy! And they work! Instead of cutting/stripping/crimping wires for hours, and calculating fuse and wire gauge sizes, you can choose a package below and assemble it in minutes! That is awesome! What is the catch?

Are the DIY solar panels UL certified?

The DIY battery community has used these units 24/7 for years, and they are now UL certified as of 2021. This means that the components inside the units are high quality. Connect some batteries and solar panels, change the settings, and you are done.

Do I need a combiner box for my solar array?

If you plan to connect a large solar array, you will need a combiner box if you have more than 2 strings of panels in parallel. A combiner box provides over current protection for each string and helps keep the voltage down. They are available below.
