

What is a Narada high temperature front access battery?

The Narada High Temperature Front Access VRLA batteries provide superior battery life in applications with a nominal operating temperature of 35°C. These batteries are ideally suited for telecom base station, OSP, and renewable energy applications.

Who is Narada Battery?

Narada Battery is a leading battery manufacturer for storage batteries in the telecom power source industry in China, established in 1994 in Hangzhou, China. They specialize in research, development and manufacture of the highest quality high rate, deep discharge and intensive cycling service batteries.

What is a Narada lithium iron battery?

The Narada lithium iron battery product series uses new LiFePO₄ technology. LiFePO₄ has been considered as one of the most popular cathode. Renewable energy including wind and solar power are increasingly being applied to grid and micro-grid applications but wind and solar power generated

What is a high temperature front access VRLA battery?

The Narada High Temperature Front Access VRLA batteries provide superior battery life in applications with a nominal operating temperature of 35°C. Advanced and proprietary case and cover materials, catalyst vent, grid alloy contribute to the enhanced performance characteristics at elevated temperatures. applications.
