

What are the main solar incentives in Nevada?

While Nevada doesn't offer state-specific tax credits or rebates for solar, the federal Residential Clean Energy Tax Credit can significantly reduce the cost of installation. Additionally, the state provides great incentives for solar batteries.

Who is NV Energy?

NV Energy is the largest utility company in Nevada with more than 1.5 million customers. The company manages several programs that offer incentives for energy efficiency upgrades in homes and businesses. The Energy Storage Incentive Program offers rebates for battery systems coupled with solar panels.

Do you get paid to go solar in Nevada?

Nevada homeowners may also get paid to register a renewable energy system to generate and sell portfolio energy credits. The federal solar investment tax credit (ITC) is the biggest incentive for most people going solar in Nevada.

Can a homeowner association use solar energy in Nevada?

The state of Nevada has laws that guarantee access to solar energy. This means nobody can restrict a person's use of photovoltaic (PV) panels, including homeowner associations. Local laws override any contract, ordinance or legal document with unreasonable restrictions for renewable energy sources.

Does NV Energy have a net metering program?

NV Energy has the largest net metering program in Nevada. To participate in the NV Energy program, your solar energy system must pass an inspection from city or county building authorities. You can submit your solar project documents and application through the PowerClerk platform.

Can you get a solar tax credit in Nevada?

Leasing or entering a power purchase agreement (PPA) is often cheaper upfront, but you won't be eligible for the federal solar tax credit and other financial incentives. Nevada homeowners may also get paid to register a renewable energy system to generate and sell portfolio energy credits.
