

Does New York offer a solar rebate or tax credit?

New York offers a rebate program and state tax credit for solar panel systems for its residents. New York residents who move to solar may achieve a payback period of less than five years due to the high electricity rates, which are 52% higher than the U.S. average.

Does New York offer a solar tax credit?

In addition to the statewide tax credit, New York also offers a solar rebate called the NY-Sun Block Incentive or the NY-Sun Initiative. This provides a cashback incentive of between \$0.20 and \$0.80 per watt installed for qualifying customers.

What are New York solar incentives?

NY Solar incentives are the best way to reduce, or in some cases, eliminate the upfront costs of going solar in New York. There are numerous types of solar incentives offered in New York including tax credits, tax exemptions, net metering policies, solar rebates, flexible financing options, and more!

How much is the cost of a solar energy rebate?

You can claim a \$10,230 tax credit after the NY-Sun rebate, which reduces the net cost of your solar energy system to \$8,370. The passage also mentions a federal tax credit of \$5,580 and a state tax credit of \$4,650, but those are not the rebates as per the question.

Can you save money switching to solar energy in New York?

Yes, absolutely. There are many ways to save money when switching to solar energy in New York, but taking advantage of the available incentives is one of the best ways to bring costs down. The average cost of a solar electric system in New York State is around \$22,880 before any incentives or around \$16,016 after the federal tax credit.

How much does the New York Sun rebate cost?

The NY-Sun Program offers a rebate of \$1,200 for a 6-kW system in the Con Edison area (NYC). After the NY-Sun rebate, the net price is reduced to \$18,600. You can then claim a \$5,580 federal tax credit and a \$4,650 state tax credit. The NY-Sun Program offers \$0.20/\$watt in the Con Edison area.
