

Where can I install solar panels in Newcastle?

McLanahan Corporation located in Cameron Park in the industrial outskirts of Newcastle, installed a 60kW solar panel system in 2020. This system is expected to save over \$100,000 in electricity costs during its life and will offset 959 tonnes of CO2 emissions. Compare quotes from up to 7 pre-vetted installers in Newcastle now.

How many solar panels are installed on rooftops in Newcastle?

Approximately 129 Megawatts of solar panels has been installed on rooftops in Newcastle, covering 28.8% of the residential rooftops, according to data recorded by the Australia Photovoltaic Institute.

What is Newcastle's climate like?

Newcastle's climate is warm in summer and mild in winter--perfect conditions for harnessing the sun's energy to power your home. Did you know that more than 348,000 households across New South Wales are already experiencing the benefits of solar power? Don't delay any longer--now is the time to make the switch to solar.

How much sun does Newcastle get a day?

Newcastle is no exception, receiving about 5.3 'peak sun hours' per square meter per day (on average throughout the year), according to PVWatts. Think of those 5.3 hours of concentrated sunlight as the 'fuel' for your solar system - in an ideal world, 1 kilowatt (kW) of solar installed in Newcastle would produce 5.3 kilowatt-hours (kWh) of energy.

Which NSW councils use 100% renewable electricity?

Despite being the first local government in NSW to use 100% renewable electricity for its operations, under 30% of residential buildings in Newcastle have solar, which is the lowest uptake of all councils in the NSW Hunter region and below the state average of 35%.

Are solar panels worth it in Australia?

Australia is not known as the sunburnt country without a reason - regardless of where you are on the continent, you probably receive enough sunshine on your roof to make solar panels worthwhile. Newcastle is no exception, receiving about 5.3 'peak sun hours' per square meter per day (on average throughout the year), according to PVWatts.
