

How can you receive regular solar news?

You can also subscribe to our newsletter to get solar news regularly. Solar Magazine is here to get you updated about what is going on in the solar energy industry by providing quality solar energy news regarding different aspects.

Who is Solar Power World?

Solar Power World is the source covering solar news on technology, development, and installation on a daily basis. Join us at Solar Power World for the latest updates.

What is Solar Magazine?

Solar Magazine is a news platform focused on the solar energy industry. It provides quality news and updates about different aspects of solar energy and offers a newsletter subscription for regular solar news.

Is the current solar technology good enough?

"The technology we have is definitely good enough to generate as much solar electricity as we can use around the world," says Jenny Chase, a solar analyst at the consultancy BloombergNEF who is based in Zurich, Switzerland.

Could floating solar photovoltaic panels supply all the electricity needs?

Floating solar photovoltaic panels could supply all the electricity needs of some countries, new research has shown. The researchers calculated the daily electrical output for floating photovoltaics...

What is the world's solar power capacity in 2022?

In 2022, the world had about 1.2 terawatts (TW) of generating capacity from solar power. This provided around 5% of global electricity generation. Energy strategists suggest that the world will need 75 TW by 2050 to meet climate goals.

R.Power partners with Eiffel Investment Group to develop 1 GWp of solar projects in Romania, set to power 500,000 homes and cut 420,000 tonnes of... Financing CTP supercharges solar plans with EUR200m funding injection

Latest news on the solar energy and photovoltaics industry in the USA: installations, manufacturing, markets & policy, and technology. ... Electrical contractor Rosendin to demonstrate robotic-assisted solar module installation ...

United Arab Emirates' renewable energy company Masdar signed two memorandums of understanding with Indonesia's state-owned electricity company Persero for floating solar power projects in the ...

According to the International Energy Agency, the world will spend twice as much on clean energy in 2024,

including solar, wind and nuclear, as it will on fossil fuels. John Dickerson explains ...

Idaho Power seeks to slash rooftop solar compensation by more than 60% By Kelsey Misbrener | April 11, 2025 Four Republican representatives propose phase-out of ITC for solar and wind

The global installed solar capacity over the past ten years and the contributions of the top fourteen countries are depicted in Table 1, Table 2 (IRENA, 2023). Table 1 shows a tremendous increase of approximately 22% in solar energy installed capacity between 2021 and 2022. While China, the US, and Japan are the top three installers, China's relative contribution ...

Overall, the world added 585 billion watts of new renewable electrical energy, a 15.1% jump from 2023, with 46% of the world's electricity coming from solar, wind and other ...

Global renewable energy capacity grew by 15.1% in 2024, largely driven by solar. Yet a growth rate of at least 16.6% must be maintained to reach targets of tripling renewable energy capacity by 2030. The World Economic ...

Renewable Energy Sources. Read the latest research on renewable sources of energy such as solar energy, wind power, nuclear energy, hydrogen fuel, ethanol, methane and other alternative energy ...

A self-assembled monolayer of (4-(7H-dibenzo[c,g]carbazol-7-yl)butyl)phosphonic acid is integrated in wide-bandgap perovskite solar cells, which enables a high power conversion efficiency and low ...

The world has passed a clean energy milestone, as a boom in wind and solar meant a record-breaking 30% of the world's electricity was produced by renewables last year, new data shows.

The Crimson Solar Project includes a 350-megawatt energy storage system and could supply enough power for 87,500 homes. The approval comes amid President Joe Biden's plans to fight climate change ...

Solar power is already rapidly growing in the U.S. and is forecast to far outpace natural gas in terms of new power plant additions this year.

Design, modeling and cost analysis of 8.79 MW solar photovoltaic power plant at National University of Sciences and Technology (NUST), Islamabad, Pakistan Shabhat Hasnain Qamar, Dawid Piotr Hanak

China is on track to reach its solar-power target for 2030. Credit: Zhao Yongtao/VCG/Getty. The 2030 targets laid out by the United Nations for the seventh Sustainable Development Goal (SDG 7) are ...

Solar-energy scientists and engineers, investors, consumers and governing bodies all have a role. ... News & Views 08 APR 25. Climate change "Now is not the time for despair" -- how ...

A new analysis from MIT researchers reveals that soft technology, the processes to design and deploy a solar energy system, contributed far less to the total cost declines of solar installations than previously estimated. Their ...

Firms commercializing perovskite-silicon "tandem" photovoltaics say that the panels will be more efficient and could lead to cheaper electricity. Mark Peplow is a science ...

Factor This(TM) is your premier source for green energy and storage news. Learn the latest in solar, wind, bio, and geothermal energy. ... the expertise of an equipment and technology provider and a local utility affiliate to deliver ...

3 The perspective of solar energy. Solar energy investments can meet energy targets and environmental protection by reducing carbon emissions while having no detrimental influence on the country's development [32, 34] countries located in the "Sunbelt", there is huge potential for solar energy, where there is a year-round abundance of solar global horizontal ...
