

Can you make a solar eclipse viewer?

With just a cereal box and a few items, you can make a solar eclipse viewer to protect your family's eyes during the solar eclipse. Everyone knows that staring directly at the sun is a bad idea, but why is it such a big deal during a solar eclipse? To put it simply, when the eclipse occurs, it gets dark outside.

How does a solar eclipse viewer work?

A solar eclipse viewer solves this problem by using a pinhole to project the image of the sun onto a surface. You can watch the sun's projection as the eclipse occurs with no fear of damage to your eyes. If you haven't been able to find solar eclipse glasses, this is a simple, inexpensive option that kids can help build! Save This Article!

What are the coolest solar eclipse activities for kids?

One of the coolest solar eclipse activities for kids is teaching them how to make a solar eclipse viewer. It is actually a lot easier than I imagined. With just a cereal box and a few items, you can make a solar eclipse viewer to protect your family's eyes during the solar eclipse.

How do you make a solar eclipse viewer?

Cut off the side tabs on the top of the box. Cut part of the remaining tabs to create two holes on either side of the top of the cereal box. Tape closed. Fold the tin foil in half and form it over the hole on the right. Tape it into place. Use the nail to create a pin hole in the center of the tin foil. Now, your solar eclipse viewer is ready!
