

What are the best outdoor solar lights?

For the best solar lights, consider the Urpower Outdoor Solar Lights. Its three pieces are easy to assemble and can either be staked into the ground or mounted on a wall with the included screws. You can choose from either high or low light mode, making this a simple solar light to operate.

What type of outdoor solar light do I need?

The type of outdoor solar light you choose will depend on the area that you're trying to light, as well as the ambiance you're trying to create. Soft dim light can be perfect for an alfresco dining experience, whereas bright white light is ideal for a practical lighting solution. The choice is yours!

Are solar lights a good choice for outdoor spaces?

Solar lights are a great option for illuminating your outdoor space. According to Sarah Jameson, marketing director of Green Building Elements, 'Solar lights, compared to low voltage and line voltage outdoor lights, are safer and more DIY-friendly since there's little to no wiring required at all.'

Do outdoor solar lights function?

Outdoor solar lights work best when they have access to direct sunlight to charge for multiple hours during the day. This is how manufacturers calculate battery life and runtime. They can still work on cloudy days or in areas with indirect light, but their brightness and duration may be reduced.

Where can you use solar-powered outdoor lights?

You can use them just about anywhere there is sunlight exposure--no outlet required. They're powered by solar cells that convert sunlight into electricity, which is then stored in an internal battery.

What are some types of outdoor lights?

To brighten your outdoor space, consider using a mix of outdoor lights around your property, including ground lights, accent lights just above eye level, and fixtures installed on the roof or above your driveway. For more great ways to brighten your outdoor space, check out the best garden lights, solar pathway lights and outdoor string lights.
