

How many PICC does a powerpicc solo catheter have?

One PICC. All PowerPICC SOLO(TM) Catheters combine clamp-free infusion therapy with the simplicity of reduced flushing protocols*to a minimum of once per week. *Compared to traditional clamped catheters. The PowerPICC(TM) SOLO family of products can be paired with Sherlock 3CG+(TM) Tip Confirmation for bedside placement and real-time tip confirmation.

What is a powerpicc's provenatm catheter?

The PowerPICC's Provena™ Catheter with SOLO™2 Valve Technology is indicated for short or long term peripheral access to the central venous system for intravenous therapy, power injection of contrast media, and allows for central venous pressure monitoring. For blood sampling, infusion, or therapy use a 4 French or larger catheter.

What is a powerpicc's catheter?

Note: The PowerPICC's catheter features a reverse-taper catheter design. Resistance may be felt approximately 7cm distal of catheter hub when introducing the catheter into the sheath due to an increase in outer diameter (O.D.)

Can my powerpicc* catheter change my daily activities?

Please talk to your doctor or nurse about how your PowerPICC* catheter may change your daily activities. Catheters are made of two kinds of materials: silicone or polyurethane. The PowerPICC* catheter that your doctor has given you is made of polyurethane. Polyurethane material can be damaged when some products are used to clean around them.

Where should a PICC be positioned?

Note: PICCs should be positioned with the catheter tip in the lower 1/3 of the Superior Vena Cava (SVC). Verify correct catheter tip position using radiography or other appropriate technology. WARNING: This is not a right atrium catheter. Avoid positioning the catheter tip in the right atrium.

Which PICC products can be paired with Sherlock 3CG+™ tip confirmation?

The PowerPICC(TM) SOLO family of products can be paired with Sherlock 3CG+(TM) Tip Confirmation for bedside placement and real-time tip confirmation. Ready to learn more? Let's get started.
